User Documentation

This section contains Superset documentation for users. The documentation is available from the Superset website. This page categorize the various use case users might have as well as a link to the proper documentation.

The Superset documentation goes through instructions on how to install Superset and connect it to a database. Fortunately, users do not need to perform those steps, since our instance of Superset is already available and database connections are already defined.

The Superset tool can be found here:

Unclassified: https://superset.hogwarts.u.azure.chimera.cyber.gc.ca/login/

Protected B: https://superset.hogwarts.pb.azure.chimera.cyber.gc.ca/login/
